Conference Theme and Topics:

EMI has been a global trend in higher education institutions. In 2021, MOE (Republic of China, Taiwan) launched the “BEST Program,” which aims to enhance English Medium Instruction (EMI) courses development. Under this new bilingual education policy, colleges and universities in Taiwan are encouraged to offer EMI courses. As the BEST program has run nearly for a year, instructors, students and administrators alike have witnessed some major changes in pedagogy and experienced accompanying stress and challenges. Hence the organizers notice the need for calling such a conference.

This 2023 International Conference on Bilingual Education will be held on Jun. 9th, 2023 at Asia University (AU), Taichung. The conference aims at providing a platform for dialogues and interactions between practitioners and academics in higher education on issues related to EMI, with special emphasis on the six tracks below:
